3 Year Plan (2024-2026)

FORM C - SUBSTANCE USE PREVENTION NARRATIVE

With the intention of helping every community in Utah to establish sustainable [Community Centered Evidence Based Prevention](#) efforts, fill in the following table per the instructions below.

Not every community will be at optimal readiness nor hold highest priority. This chart is designed to help you articulate current prevention activities and successes as well as current barriers and challenges. Please work with your Regional Director if you have questions about how to best report on your communities. For instructions on how to complete this table, please see the [Community Coalition Status Tool](#) here.

List every community in your area defined by one of the following:

1. serving one of the [99 Small Areas](#) within Utah
2. serving the communities that feed into a common high school
3. any other definition of community with OSUMH approval.

*All "zero" or "no priority" communities may be listed in one row

Manila High School Cone	A3,4,5	Low	<p>This High School Cone is included in the Uintah-Daggett County small area classification. Although the PAC-Uintah is specifically targeting the Uintah High School Cone data, we have the support of the Daggett County School District. Although included in the Uintah Daggett County small area, it is important to note that there is approximately an hour and half drive time between the two High School Cones and the liaison for the school district is fairly new. PAC-Uintah is able to provide limited services to the Manila Cone when requested.
