

Evidence-Based Workgroup intervention Logic Model: TEMPLATE

Intervention Name:

Problem Behavior(s) Targeted:

GOALS	TARGET GROUP	ACTIVITIES/ STRATEGIES	THEORY of CHANGE	SHORT-TERM OUTCOMES	LONG-TERM OUTCOMES
<p><i>Please specify the causal factors (e.g., risk/protective factors) targeted by the intervention</i></p>	<p><i>Please specify the target population for this intervention</i></p>	<p><i>Please specify the major <u>activities and strategies</u> that the intervention employs to create change in participants or the community. For interventions with a recommended dosage (e.g., # of sessions, hours, etc.) please provide that info first</i></p>	<p><i>Please use IF-THEN logic to explain how the activities and strategies in the previous column will lead to the desired outcomes. A logical connection between the activities and the goals should be clear based on the information provided in this column</i></p>	<p><i>Based on the Theory of Change, what outcomes (changes in participants/community) should be expected immediately at the completion of the intervention</i></p>	<p><i>What ultimate outcomes does the intervention hope to deliver that logically connect to the short-term outcomes in the previous column</i></p>
