# **Submitting for Multiple Providers**

Recovery support files can contain data for more than one provider per file. SAMHIS backend processing engines associate data in the file to the provider ID specified on every row in the file.

# **Processing Sort Rules**

Sorting as follows with subsequent sort rules applying within the 'parent' sort rule.

- System Trans Type (Delete, Add and then Change)
- Provider ID (alphanumeric ascending)
- client ID (provider's) (alphanumeric ascending)

#### **CSV File Generation Guidelines**

- 1. All files should be submitted without a header row.
- 2. It is recommended that fields **NOT** contain extra spaces for padding. For example, if a field allows 11 digits but the code values only use 3 digits then 3 digits is an acceptable width for the field. Adding the spaces only increases the size of the file and slows down uploading and processing of files.
- 3. Non-required fields must either be blank or contain a valid value.
- 4. Commas are not allowed within the data in any field. (Commas are column delimiters.)
- 5. Do not use quotes in any fields.
- 6. Do not insert blank lines between rows.

# **Column Specs**

The following table lists the fields and all rules associated with those fields.

NOTE: No blanks fields are allowed in the file except where specified in the note field.
