#### Calculations for SA Outcomes:

All outcomes are percent increase or decrease. Specific percentages are calculated as follows using FY final discharges, excluding detox-only clients. Percents at admission and discharge are calculated by dividing the number of clients reporting the outcome divided by the total number of discharged clients with valid, non-missing, data for that measure:

Abstinence (Percent Increase):  
(Percent abstinent at discharge *minus* percent abstinent at admission) *divided by* percent abstinent at admission

Stable Housing (Percent Increase):  
(Percent not homeless at discharge *minus* percent not homeless at admission) *divided by* percent not homeless at admission.

Employment/School (Percent Increase):  
(Percent employed/student at discharge *minus* percent employed/student at admission) *divided by* percent employed/student at admission.

Criminal Justice (Percent Decrease):  
(Percent arrested at 30-days prior to admission *minus* percent arrested 30-days prior to discharge) *divided by* percent arrested 30-days prior to admission.

Length of Stay:

Median length of stay calculated from admission date to date of last contact for those discharged in the fiscal year
