## All Adult Served Clients

### Definitions and Calculations:

- Client totals are distinct/unduplicated per area; State is unduplicated across the state, Rural is unduplicated across the rural centers, Urban is unduplicated across the urban centers. Rows cannot be added in a column.
- Clients can receive multiple service types and may be duplicated across service types. Columns cannot be added across service types.
- Supported employment includes # of clients with a supported employment status anytime during the fiscal year.
- Supported Housing includes count of clients that received that service anytime during the fiscal year (service code 174 only).
- Jail Services client counts are from those who received services with a location code of Jail.
- Employment includes # of clients who were employed or did not stay unemployed during the fiscal year.
- % Employed includes # of clients employed (full time, part time, or supported employment) divided by the number of clients in the workforce. Workforce includes clients who are employed (full time, part time or supported employment) and/or unemployed but seeking work.
- \*Mobile Response services performed in Salt Lake County are submitted by the Huntsman Mental health Institute.
- Estimate of Need— Substance Abuse and Mental Health Services Administration. Substate Estimates of Substance Use and Mental Disorders from the 2018-2020 National Surveys on Drug Use and Health: Results and Detailed Tables. ## Adult Client Outcome Measures

### Definitions and Calculations:

^ Discharge includes clients who have been discharged in the current year or have not received any events of service for at least 7 months.

Valid OQ Clients Served exclude clients who received assessment and testing only and clients served while in Jail.

Percent of Clients Participating: Minimum requirement is 50% or more.

Clients and Episodes are included if there are 2 or more valid administrations per instrument where one or more was administered within the fiscal year.

Deteriorated: Clients who have had a \*Clinically Significant increase in symptoms from intake.

Improved: Clients who have had a \*Clinically Significant reduction in symptoms from intake.

Recovery: If a client's score drops below the empirically derived cutoff between clinical scores and community normative scores and there has been \*Clinically Significant change, then the client is classified as recovered.

Clinically Significant: calculated using the instrument's Reliable Change Index (RCI) and cutoff score, which together define standards for clinically significant change achieved during mental health treatment. The RCI is the amount by which a client's total score must increase (deterioration) or decrease (improvement) from intake to be considered clinically significant. Changes in the total score that are less than the RCI are not statistically relevant (i.e. no change).

Outcomes are not calculated until there has been reliable change within a given instrument. Outcomes; Improved, Stable, Recovered, and Deteriorated are calculated by episode.
